ANSWER SHEET
WRITING

Guide book about Khaty-Mansiysk

My name is Egor Taranikov, I am an ordinary citizen of a Khaty-Mansiysk of 2150. All Russian cities and towns are extremely modern nowadays and Khaty-Mansiysk isn't the exception.

In our city everyone loves to go in ^{to} many different museums, this is because we have a lot of robots, they are catering us. For example only one robot can show everything in the museum for a group of 25 people! In Khaty-Mansiysk isn't everything great, our system of traveling is very old compared to other cities. While many cities already using a technology of teleportation, we still have to travel on flying buses. We also loves our restaurants, not only they have our national food, but ~~there~~ they all have very delicious food that was integrated for us from Andromeda! Nowadays a very small amount people are working on ordinary jobs, this is because AI and robots fully replaced hundreds of a workers ~~around~~ forty-six years ago. Now we have only a few workers that are repairing software of our robots.

In our city only one school that is still usable, and this is because most of parents now prefer to use an Android, they will teach their children everything about life personally. Everyone can spend their free time however they want in Khaty-Mansiysk, but for me best way to spend time is get a free vehicle and just travel around the city.

I hope that more tourists will want to visit Khaty-Mansiysk after this guide book. I wish them good luck
